Invitation to participate in our Wildfire Preparedness Survey

The University of California Agriculture and Natural Resources (UCANR) is interested in your opinions on wildfire preparedness. The objective of this survey is to better understand how rural communities are preparing for wildfire. Your participation will help guide future university research, fire preparedness programs, educational training, and enhance funding efforts to support rural communities with high fire risk.

We would like to ask you about how you and your community are preparing for wildfires and we invite you to participate in an online survey to tell us. The survey has 65 questions and should take approximately 15-20 minutes to complete depending on the length of your responses. The survey is broken into four primary sections:

1. About your Community
2. Home Hardening
3. Defensible Space
4. Evacuation Preparedness

Your participation in the survey is voluntary and answers to the survey will be anonymous. The results will only be reported as summaries and will be shared in an aggregate form via reports, peer-reviewed publications and conference presentations. If you agree to voluntarily participate in this research project as described, please indicate your consent by completing the survey. If you decide not to take the survey you can close out the survey at any time.
