Re: Almanor Peninsula Wildfire Protection Project

I provide this letter in support of the Plumas County Fire Safe Council's (PCFSC) Almanor Peninsula Wildfire Protection Project. The project aims to reduce risk from wildfire to the communities and critical infrastructure on the Lake Almanor Peninsula east to Hamilton Branch, as well as re-establish a forest structure that is resilient to the effects of wildfire.

I am a property owner in the Lake Almanor basin and believe this project will benefit our community and am one who seeks to defend our natural and human resources from wildfire. We are all recovering from the devastation of the Dixie Fire and are working on basin-wide efforts for the future safety of our communities.

The Chairs of Firewise committees around Lake Almanor are meeting to coordinate efforts on fire safety and we hope to continue to involve everyone in evacuation exercises and future education on defensible space programs and other fire mitigation options. The proposed PCFSC project will provide a clear demonstration to residents and visitors of the type of work that we would like to encourage in other areas throughout the community.

I look forward to supporting the Sierra Nevada Conservancy through my committee, as we work with local partners to protect our community.

Sincerely,
